

## Connecting your School Device to your WIFI at home

At the login screen click on the wifi icon in the lower right hand corner.

When you click on the wifi icon it will bring up all the available wifi networks in your vicinity. Locate your wifi network and click on it and click on connect.

This will then allow you to put in your wireless network password. Once you have entered your password click next. This will connect you to your wireless and you can now log in windows using your user name and password.
